Dynamic Websites and Databases

This radio program will give organizations free tips and ideas on what to do in order to benefit from their websites, databases and the web.

Here are some of the specific benefits you can put to use immediately.

- Practical ideas on what you can do to make your website interactive and dynamic
- What you need to make your website respond to the demands of customers and stakeholders
- Transforming your website into a support system that attends to your customers and stakeholders even when your staff is off-duty
- How to transform a traditional website into a machine that finds customers for your business
- The technologies you need to have your website process electronic payments

We will be giving FREE advice on these and other issues concerning databases and websites.

Phone in and get actionable ideas that will take your organization to a higher level.
